# Status of HDF-EOS Aura Guidelines

Cheryl Craig

National Center for Atmospheric Research

# Changes Since Last DSWG

- V2.12 was released to the public web site on October 30, 2006
- Worked on Technical Note of the Aura Guidelines for the NASA Standards Process Group
- Submitted Technical Note to Standards Process Group (SPG) on September 4, 2007
  - Has passed internal SPG review
  - Will be sent out to technical expert reviewers to check for accuracy and completeness.

# Differences between Original Aura Guidelines and New Technical Note

- Extensive rewrite of introductory sections
  - Aura Guidelines were written for a group of Aura implementers “in the know”
  - Technical Note written for an external audience with no prior knowledge and not Aura specific
- Minor modifications to the instrument team’s fields

# Aura Guidelines vs. Technical Note

- Authors agreed that should only maintain one version of Guidelines and that it should be the Technical Note
- Ready to put Technical Note on the public web site?
- Use the same web address?

# Aura Document Location
